

Empowering insights with VendAware™

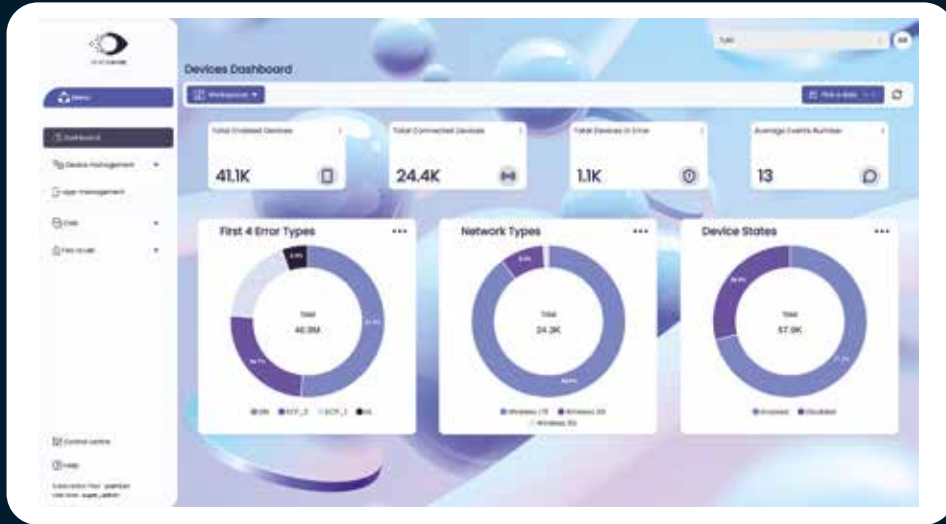

Harness the power of our comprehensive business intelligence platform to drive results with insights.

Experience the future of IoT management with VendAware™, our cutting-edge cloud-based platform. Effortlessly integrating with IoT-connected devices, VendAware™ delivers robust data analytics to enhance user experiences and employs predictive analytics to effectively minimise maintenance costs for automated stores.

With comprehensive control over both the device and the accompanying app, we harness the ability to meticulously trace the device's operational history and map the end user's journey. This comprehensive data empowers vending operators with invaluable insights, enabling them to fine-tune operations, optimise sales strategies, and seize new revenue opportunities through the utilisation of dynamic contents and digital signage. Unlock additional value with our premium features, including expanded data analysis tools for asset management, connectivity oversight, alarm monitoring, remote updates, and scalability to a comprehensive content management system and beyond.
